NEW SAFESIDE® FLEX-MOUNT VOLTAGE INDICATOR

Flex-Mount voltage indicator is a Permanent Electrical Safety Device (PESD) that conveniently mounts onto any electrical equipment with an M20 or 3/4" conduit knockout. This 3-phase voltage indicator uses redundant, longlife LEDs to provide a visual indication of energy presence. Both the 4-wire and NEW 5-wire configurations can be mounted virtually anywhere. **For more information on this product and our entire line of voltage indicators, contact your local sales representative and/or distributor.**
