Product Change Notification: Safe-Test Point™ Dust Cap

PCN#: PCN240517A
Effective Date: May 17th, 2024

Grace Technologies is committed to continuously enhancing the quality and reliability of our products. We are pleased to announce an upgrade to the dust cap design of our Safe-Test Point™ Permanent Electrical Safety Devices (PESDs). Detailed below are the specifics of this design update and its implications.

Change Details:

- **New Cap Design:** We have adopted a standard black, polycarbonate dust cap inspired by the ChekVolt® design. This cap is also available in clear polycarbonate.
- **Security:** The updated design of the dust cap encapsulates the Safe-Test Point™ on the panel's exterior and features a torque screw for secure closure, ensuring that the cap stays in place during use.
- **Installation:** This cap must be installed during the initial installation of the Safe-Test Point™ because the conductors need to be pulled through it. To retrofit an existing PESD, the conductors must be disconnected and reinstalled to accommodate the cap.

Impact:

- **R-3MT Series:** The modification affects only the cap's aesthetic and installation method. It does not alter the technical specifications or the operational functionality of the Safe-Test Point™. Below are the part numbers impacted by this change:

R-3MT-KIT-H	R-3MT-EZ-H	R-3WMT-LMH	R-3WSMT-LMH	R-3W2MT-LMH
R-3MT-KIT-F	R-3MT-EZ-F	R-3WMT-LMF	R-3WSMT-LMF	R-3W2MT-LMF

- **R-3MT-1K Series:** The following part numbers have been impacted by this change and will be unavailable until we are able to recertify the cap. Anticipated completion date is September 2024.

R-3MT-1K-KIT-H	R-3WMT1K-LMH	R-3WSMT1K-LMH
R-3MT-1K-KIT-F	R-3WMT1K-LMF	R-3WSMT1K-LMF

We encourage you to update your records to reflect this change and prepare for its implementation in forthcoming product deliveries. Should you need more information or assistance, please get in touch with our sales team at Sales@GraceTechnologies.com.

Sincerely,

Eric Norton
Engineering Team Lead
