

What Is Proxxi?

Proxxi by Grace is a wearable voltage detector that provides real-time alerts—vibration, light, and sound—when a worker approaches AC voltage (110V to 500kV). It enhances situational awareness and supports Lockout/Tagout (LOTO) and Personal Protective Equipment (PPE) procedures.

Who Should Use Proxxi?

- Electrical contractors (field crews, retrofit, and service work)
- OEMs & system integrators (startup & commissioning teams)
- Facility electricians and EHS teams
- Anyone working around potentially energized AC systems

Who Shouldn't Use It?

- Non-electrical workers (office staff, general labor)
- Environments with only DC voltage
- Jobs requiring Bluetooth-disabled tools

PROXXI ECOSYSTEM: TOOLS & APPS

Proxxi App (iOS & Android)

- Adjust sensitivity, mute alerts, sync data, and update firmware
- One band per phone connection
- No GPS; Bluetooth + location permission required for sync
- [Download Proxxi App](#)

Proxxi Hub App (for managers)

- Sync multiple wristbands at once
- Push firmware updates
- No login or data access required
- For iOS 16+
- Ideal for IT/maintenance leads overseeing deployments

Proxxi Dashboard

- Web-based insights: usage reports, alert trends, near-miss identification
- No GPS—only voltage interactions
- Customize alerts & group data
- [Access Dashboard](#)

Part Numbers & Pricing

Part Number	Description	MSRP
W-PRX-WB6-0Y	Proxxi Band, 60Hz, no subscription	\$455
W-PRX-WB6-1Y	Band + 1-year Dashboard Access	\$564
W-PRX-WB6-2Y	Band + 2-year Dashboard Access	\$734
W-PRX-WB6-3Y	Band + 3-year Dashboard Access	\$884
W-PRX-BAND	Replacement strap	\$25
W-PRX-CHRG	Charger dock	\$90
W-PRX-CABL	Charging cable	\$10
W-PRX-HCP1	Helmet clip	\$25
W-PRX-SUB-1Y	1-year subscription renewal	\$200

Pilot Program

- Cost: \$5,000
- Includes: 6 Proxxi Bands, Dashboard access, onboarding support, 90-day trial
- Hardware Refundable: Return in good condition within 45 days (excludes service setup fees)
- Try-before-you-scale for teams exploring a full rollout

Proxxi Promise (Pro Plan Only)

Proxxi Pro users receive our Proxxi Promise: If a worker is injured while using Proxxi, Grace will pay up to \$100,000 toward the worker's medical deductible. Only available with Proxxi Pro subscription plan.

Distributor Demo Program

Part Number	Description	MSRP
W-PRX-WB6-DM	Distributor demo unit	\$165 (before discounts)

- Drop-ship multiplier: 0.80
- Stocking distributors with barcode capability may receive further discounting

FREQUENTLY ASKED QUESTIONS

Q: Can bands be shared?

A: Yes, but they must be unpaired from the original app first.

Q: Can bands be shared?

A: Yes, but they must be unpaired from the original app first.

Q: Can I change the default 480V setting?

A: Yes, use the app to adjust to your work environment (600V, 5kV, etc.).

Remember: Proxxi **does not prevent shock** but **alerts users to potential voltage**, serving as a **crucial last line of defense** alongside **standard LOTO and PPE**.

Q: Does it work under gloves or PPE?

A: Yes, alerts are audible, visual, and also provide vibration.

Q: How long does it take to charge?

A: About 4 hours.

Q: How long does the charge last?

A: Up to 30 hours, depending on usage.

Q: What if I can't wear jewelry/accessories?

A: Use the optional helmet clip (Part #: W-PRX-HCP1) to wear Proxxi without it touching your skin.

Q: Does the band work without the Proxxi App?

A: Yes. The app is required for setup, syncing, and updates, but not for day-to-day use.

Q: Is data secure?

A: Yes, data is encrypted, GDPR/SOC3 compliant, and contains no GPS location.

Q: Does it alert through walls or shields?

A: No, Proxxi detects AC electric fields in open space, not through enclosures.

Q: How far away will it alert?

A: Default 480V triggers at ~18 inches (45cm). Distance increases with voltage.

PG-PB-FAQ-EN 2504

Q: Is there a breakaway strap?

A: Yes, for safety around rotating equipment.

Q: What's the renewal cost for subscriptions?

A: \$200/year per band (W-PRX-SUB-1Y).

Q: Are quantity discounts available?

A: No, pricing is standardized.

Q: Is the band metal-detectable?

A: No, and it is not recommended for food-processing zones where metal contamination is a concern.
